CAREER OBJECTIVE

Python Developer with professional experience building scalable backend applications using FastAPI and PostgreSQL. Experienced in RESTful API development, asynchronous programming, database integration, and AI-powered solutions including RAG-based search and recommendation systems. Passionate about building reliable software and solving real-world engineering challenges.

EDUCATION

- Green University of Bangladesh** 2023
B.Sc in Computer Science and Engineering CGPA: 3.84/4.00
- Nurjahan Kamil Madrasha, Dinajpur** 2017
Alim (Equivalent of HSC), Madrasha Board GPA: 4.31/5.00
- Nurjahan Kamil Madrasha, Dinajpur** 2015
Dakhil (Equivalent of SSC), Madrasha Board GPA: 4.39/5.00

PROFESSIONAL EXPERIENCE

- Alora Cloud (A Sister Concern of Alpha Net BD)** 2026 – Present
Python Developer Dhaka, Bangladesh
 - Developed and maintained scalable backend services using Python and FastAPI.
 - Designed and implemented RESTful APIs for production applications.
 - Collaborated with Next.js developers to integrate backend services.
 - Worked with PostgreSQL and SQLAlchemy for database design and optimization.
 - Built and maintained donation, campaign, and contributor management features.
 - Debugged production issues and improved backend reliability.
- Softvance** 2025
Frontend Developer Dhaka, Bangladesh
 - Participated in client meetings to gather requirements and provide technical solutions.
 - Developed and customized client web applications using JavaScript and Velo by Wix.
 - Collaborated with the team to deliver responsive client projects.

PROJECTS

- ShopSense** 2025
Full-stack eCommerce Platform [Portfolio]
 - Built REST APIs for product, cart, and order management using Django.
 - Integrated AI-powered search, recommendations, and RAG-based chatbot.
 - Developed responsive frontend components with Vue.js.
- Grocery Management System.** July 2025
Inventory and Sales Tracking System [GitHub]
 - Implemented CRUD APIs using FastAPI and SQLAlchemy.
 - Designed relational database schema and handled backend testing.
- Phone Scraper + RAG API** October 2025
FastAPI Service with Web Scraping and AI [GitHub]
 - Scraped GSMarena data with rate-limit handling and PostgreSQL storage.
 - Built RAG-based API for natural language phone specification queries.

TECHNICAL SKILLS AND INTERESTS

Languages: Python, JavaScript, SQL, C
Backend: FastAPI, Django, Flask
Databases & ORM: PostgreSQL, MySQL, MongoDB, SQLAlchemy
Frontend: Vue.js, Next.js
Core Concepts: OOP, Data Structures, Async Programming, REST APIs, Dependency Injection
Tools: Git, GitHub, Docker
AI Technologies: RAG, AI Chatbots, Recommendation Systems
Developer Tools: Git, GitHub, Docker, Claude Code, Gemini CLI, Model Context Protocol (MCP)

POSITIONS OF RESPONSIBILITY

- **Team Lead,** CSE Project Lab, GUB 2022 – 2023

ACHIEVEMENTS

- **Vice Chancellor’s & Dean’s Certificates** Consistent academic excellence 2019 – 2023
- **Cybersecurity (6-Month Program)** Topper of the Batch, Byte Capsule 2023
- **IEEE Publication**Co-authored paper "Enhancing HHGSO Algorithm for Cluster Head Selection" 2023
